

Exploring Future Training Options August 24-25, 2005

Workshop presented by the Institute for Environmental Monitoring and Research

The Institute for Environmental Monitoring and Research (IEMR) has the mandate to oversee the environmental effects of allied flight training conducted from the Canadian Forces Base at Goose Bay, over areas of Labrador and northeastern Quebec. In order to carry out this mandate, several approaches have been used to promote awareness of the Institute's activities to interested groups and individuals. "Exploring Future Training Options" is the 4th in a series of Institute sponsored workshops/conferences promoting the flow of information with the public. Workshop proceedings will be published in a future edition of Terra Borealis.

The Institute for Environmental Monitoring and Research is governed by a Board of Directors with aboriginal and municipal representation. It also has members representing federal and provincial governments. The objective of this workshop is to gain insight into the environmental implications of proposed training activities for 5 Wing Goose Bay.

Who Should Attend?

- IEMR Board Members
- Research Associates
- Government Representatives
- Aboriginal Groups
- Municipal Groups
- Interested members of the general public
